Topic: Cybersecurity governance – a model to counteract this key risk issue for organizations in North America

Cybersecurity is a complex topic that challenges the governance professional to be well informed. Richard Wilson will share a unique, leading edge cyber governance model that explains what good “defence-in-depth” security governance looks like. This model is illustrated by a practical example of how to apply this governance framework within your own organization. The session will be a great combination of strategic thinking and practical application that would be appropriate for all governance professionals.

Speaker: Richard Wilson, CISSP

Richard is a Partner in PwC Canada's Cybersecurity & Privacy Consulting practice. He helps boards and management teams understand and strategically defend against the rapidly evolving cybersecurity threats today. By strategically linking risk, performance, cybersecurity, and privacy, Richard equips companies to develop practical approaches to create defense-in-depth.

He has 23 years of professional services experience, including 15 years in a CEO or COO role for publicly traded and private companies. He has more than a decade of experience advising boards and C-Suites on governance, strategy, organizational planning, risk, and risk response.

Richard has been published in Compliance Week, Canadian Business, and the Globe & Mail and is a keynote speaker on the cybersecurity & risk in Canada, the US, and Mexico. He is Chair of PwC's Risk Forum, and is an active board member of CPA Canada's Corporate Oversight & Governance Board.
